## What is the Mechanism?

- 1) Astronomical instrument,
- 2) Observations
- 3) Calendar
- 4) School demonstration
- 5) Show up to friends
- 6) Measure Geographic latitude
- 7) Measure Geographic longitude (with the Moon Mechanism, Hipparchus)
- 8) Cartography
- 9) Navigation

## Use the Mechanism Attractor of Children to Science, Mathematics, Engineering and Technology

- 1) Astronomy attracts children,
- 2) The Mechanism has a mystery and attracts children
- 3) Show to the children that there are laws of nature
- 4) The Mechanism is a good example of modeling nature using physics mathematics and technology
- 5) It demystifies computers
- 6) We have good 3D interactive applications
- 7) Bronze model

The Mechanism  
in the  
*Children's Museum  
of Manhattan*

The background image shows a museum display case containing several ancient Greek vases. In the center, the Antikythera Mechanism is visible, a complex ancient Greek analog computer. The text is overlaid on this image.

An interesting old astronomical instrument of the 2nd century BC is the Antikythera Mechanism found in an ancient shipwreck, that looks like an oxidized grand mother's clock made of bronze gears.

This is the oldest known analogue computer.

- Calculates the position of the Sun,
- the Moon (its phases),
- the eclipses of the Sun and the Moon,

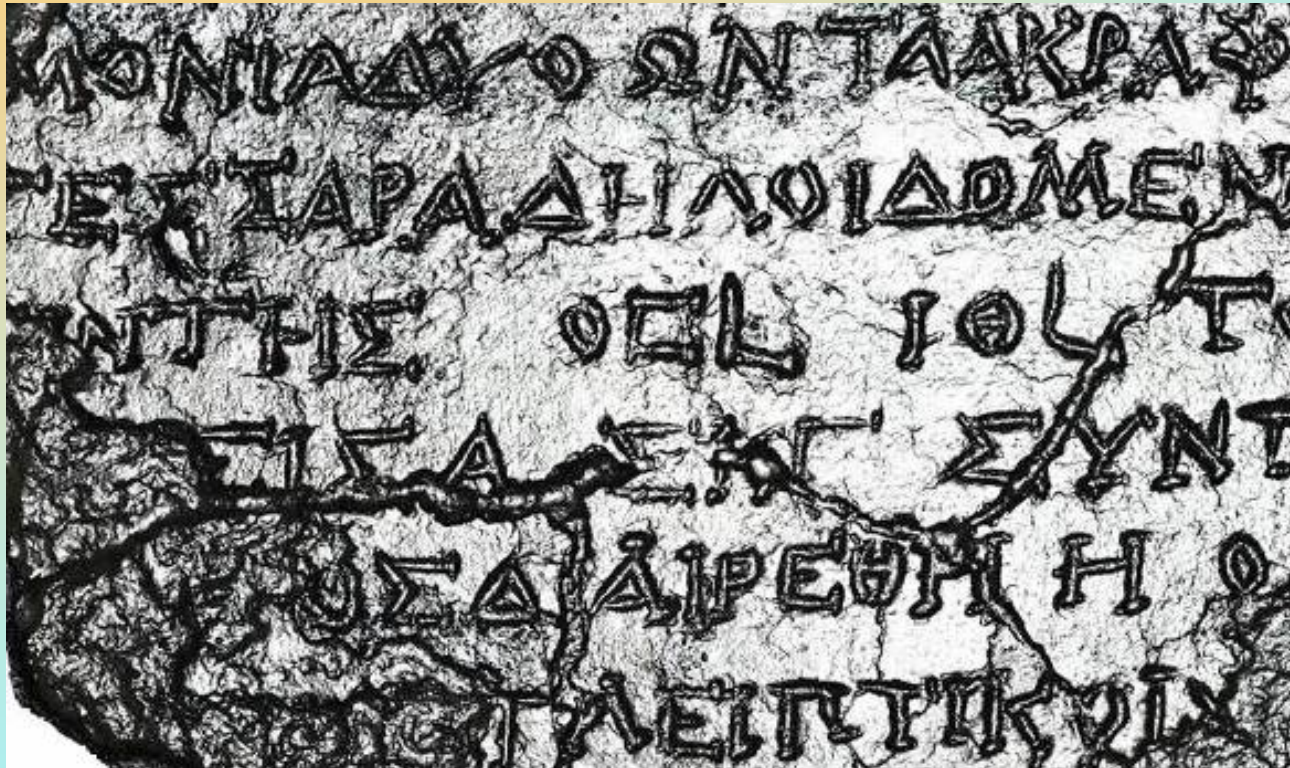

is has several calendars, based on the

- Saros, 18 years and 8 hours**
- Exeligmos, 54 years and one day**
- Meton's 19 years and**
- Callippus cycles 76 years**

**Many dials (Olympic games, Nemean Games etc)**

# The Antikythera Mechanism one of the most important archeological artifacts ever found!

dates between 150 and 100 BC

in a highly complex arrangement.

•engineering is astonishing

-What it actually means for science, the world..

-The Mechanism gives new insight to the history of humanity

-rewrites some chapters of the history of astronomy, mathematics, science and technology and **humanity**

**-What do the inscriptions say/mean?**

**-It is a computer user manual:**

**A) mechanical manual**

**B) astronomical manual**

**i. Sun,**

**ii Moon**

**(position, phase during the month),**

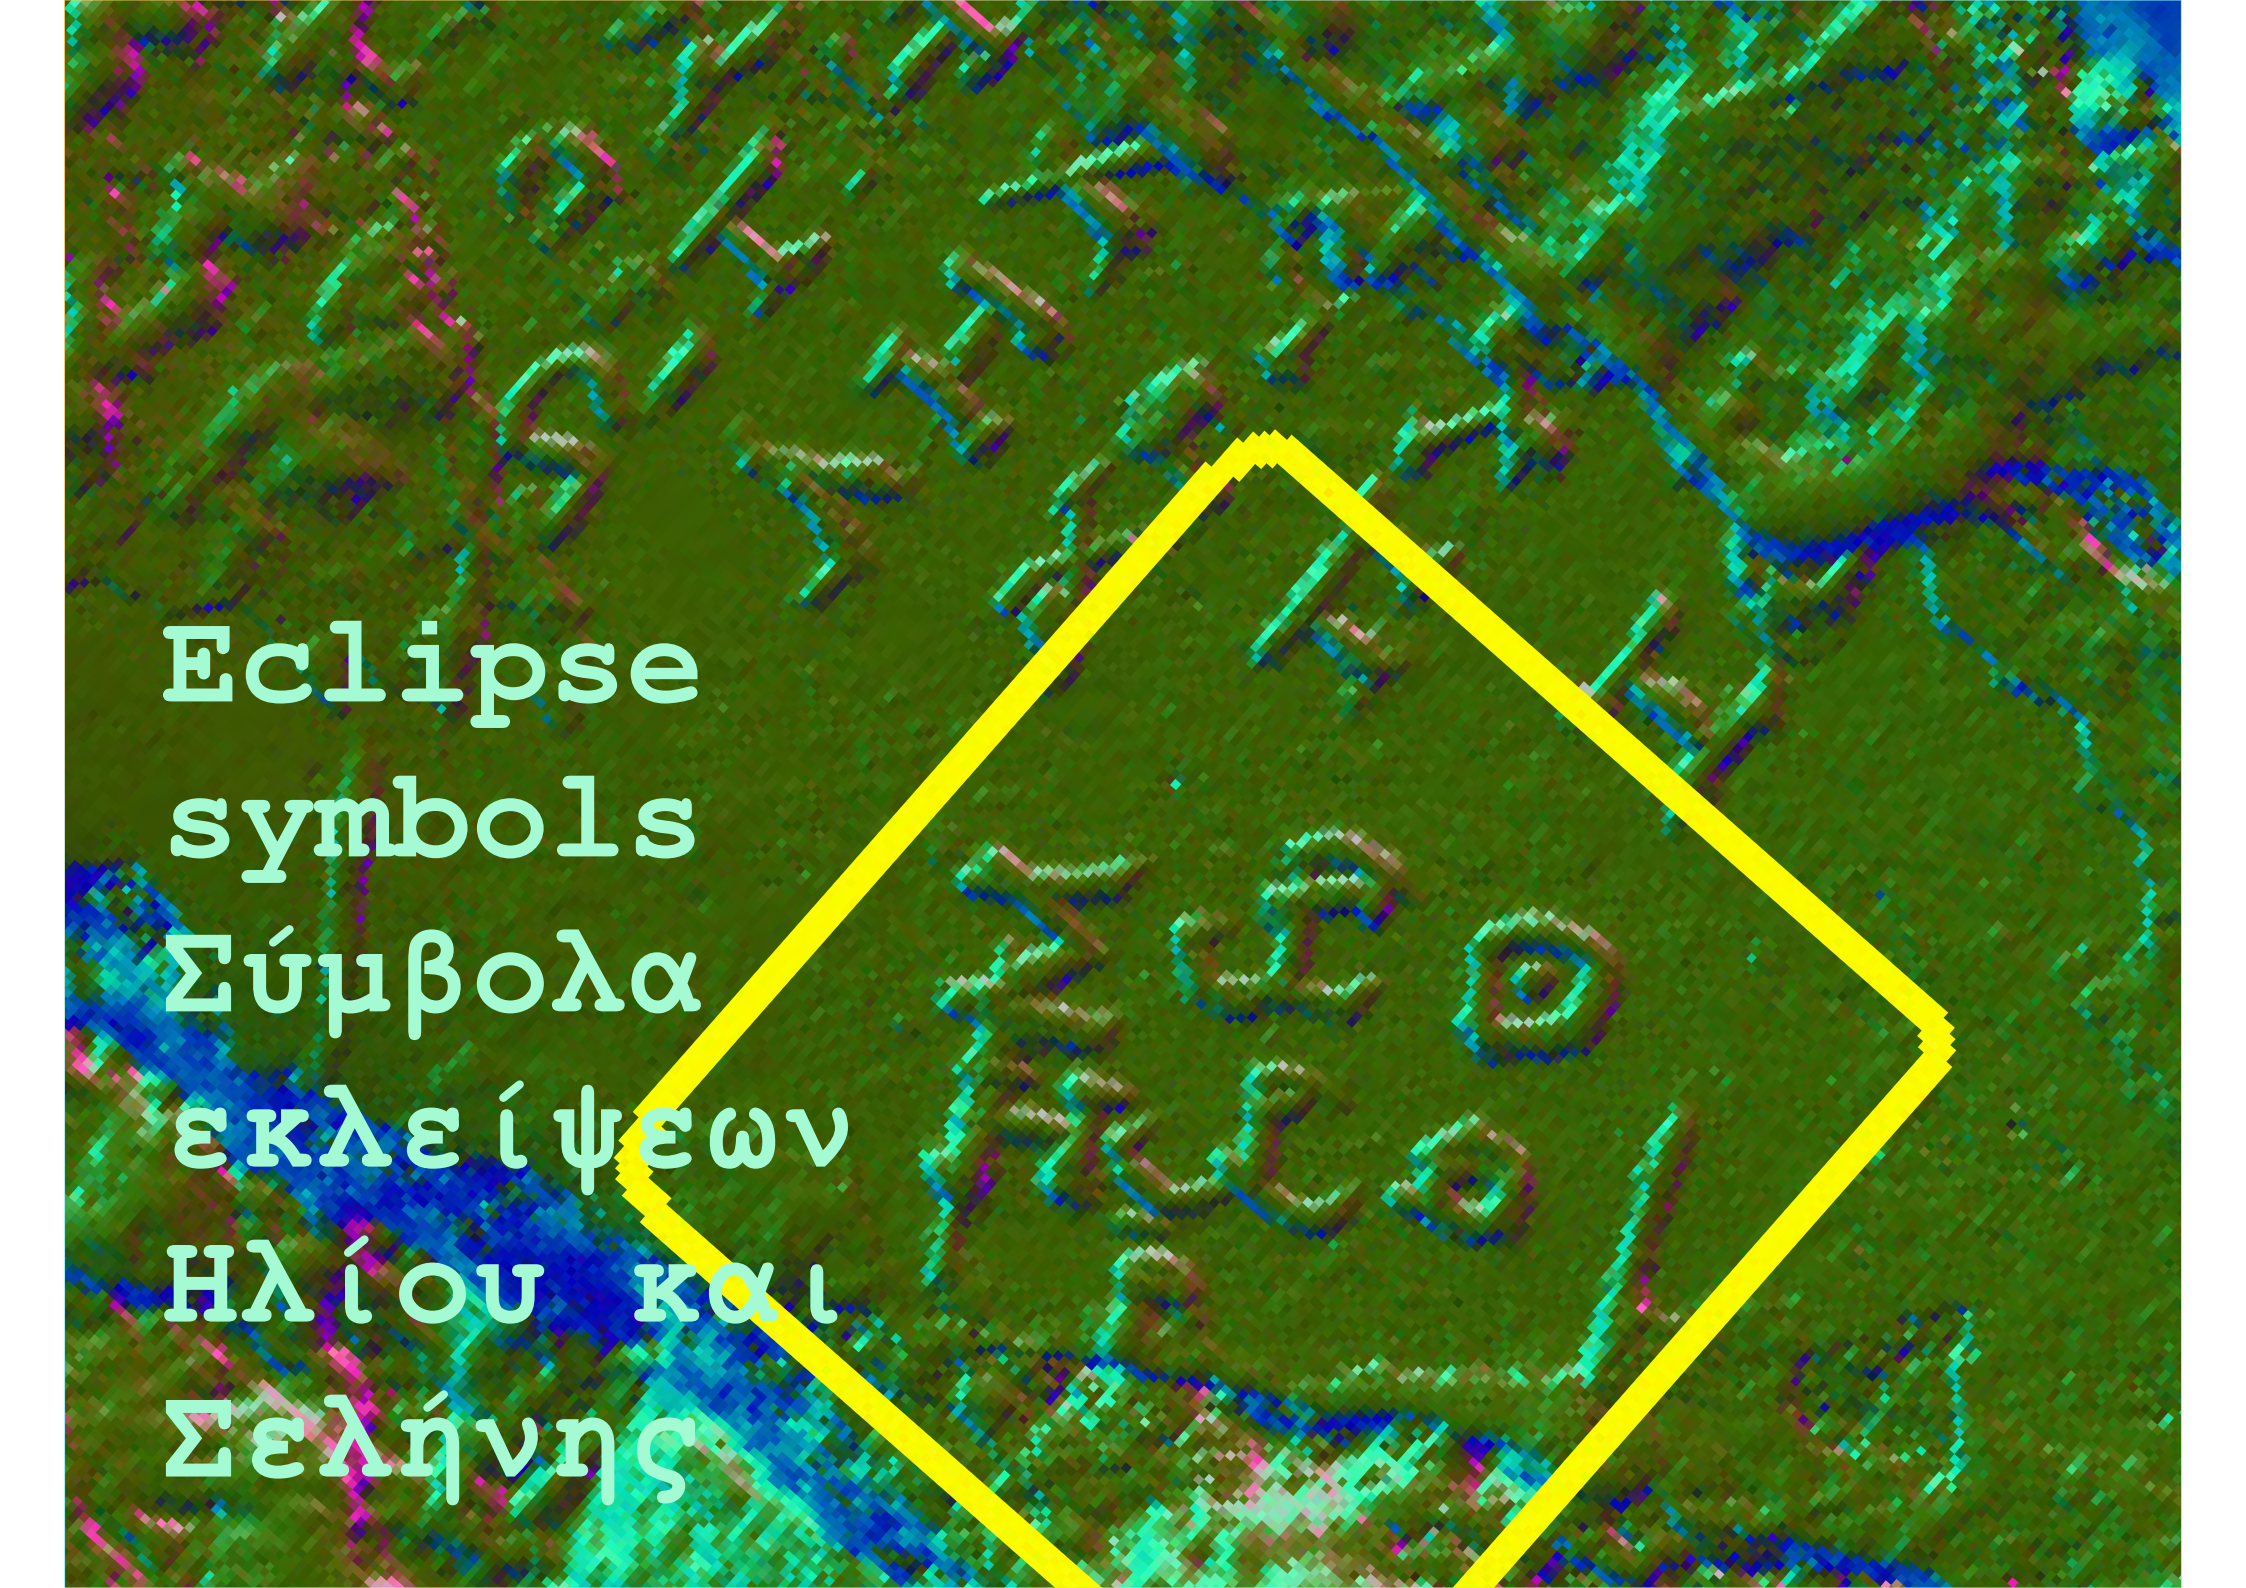

**iii Planets,**

**iv eclipses**

**C) geographical manual (?)**

The background is a complex, multi-colored pattern of small, irregular shapes in shades of green, blue, cyan, and purple. A large, bright yellow diamond shape is superimposed on the right side of the image, pointing downwards.

## Functions of the Mechanism

- 1) Astronomical instrument,
- 2) Observations
- 3) Calendar
- 4) School demonstration
- 5) Show up to friends
- 6) Measure Geographic latitude
- 7) Measure Geographic longitude (with the Moon Mechanism, Hipparchus)
- 8) Cartography
- 9) Navigation

We are looking for collaborators to  
present in an exhibition  
The Antikythera Mechanism in your  
country for the children of your country  
in your institution or any appropriate  
Museum, Planetarium, University,  
Observatory
